

InnerHealth Laboratory

30151-B Avenida De Las Banderas, Suite 100A
Rancho Santa Margarita, CA 92688
Phone: (949) 272-3618 Fax: (949) 264-6130

Lab Director: Daniel W. Leighton, CLB
CA ID: CDF-00339441
CLIA ID: 05D2001811

Test Ordering Information

PATIENT INFORMATION

Name: GOTA, KAITO
Date of Birth: 09/20/2010
Address: 91 LONG MEADOW
IRVINE, CA 92620
Phone: (206) 407-4155
School Site: Woodbury Elementary School

SPECIMEN INFORMATION

Specimen Type: SALIVA
Accession #: 00069769
Collection Date: 11/18/2021
Received date: 11/18/2021
Reported Date: 11/18/2021

ORDERING PHYSICIAN

Account: VOGEL
Name: JEFFREY VOGEL, MD
Address: 30151 AVENIDA DE LAS BANDERAS
RANCHO SANTA MARGARITA
CA, 92688
Phone: 949-272-3618

PATIENT DEMOGRAPHICS

Sex: M
Race: A
Ethnicity: NH

COMMENTS:

Test	Pathogen Tested	Your Test Result	Reference Range
COVID-19 RT-PCR	SARS-CoV-2	NEGATIVE (NOT DETECTED)	NEGATIVE (NOT DETECTED)

Authorized laboratories may use this test to detect the SARS-CoV-2 RNA in saliva specimens under the FDA Emergency Use Authorization (EUA). The sensitivity of the assay is dependent on the quality of the specimen and the timing of the specimen collection (in relation to symptom onset).

Test Interpretation

DETECTED result indicates that severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) RNA is present and suggests the diagnosis of coronavirus disease 2019 (COVID-19). Test results should always be considered in the context of a patient's clinical history, physical examination, and epidemiologic exposures. Positive test results for SARS-CoV-2 do not exclude the possibility of concurrent infection with other respiratory viruses.

NOT DETECTED result indicates that SARS-CoV-2 RNA is not present in the patient's specimen. However, this result may be influenced by the stage of the infection and quality of the specimen collected for testing. Undetected (negative) results do not rule out COVID-19 in patients and should not be used as the sole basis for patient management decisions. All results should be correlated with the patient's history and clinical presentation.

INCONCLUSIVE result indicates that the specimen was of poor quality and the assay failed. A new specimen is required for retesting.
