XR CHEST PA OR AP (Order 7480881)

10/12/2021 9:56 PM - Interface, Radiology Results In

Narrative & Impression

CHEST, 1 VIEW

CLINICAL HISTORY: Cough, unspecified
Abnormal blood-gas level

COMPARISON: None.

FINDINGS:

The heart is normal in size.

There is perihilar and lower lung bronchial wall thickening which could reflect asthma, bronchitis, or acute infection in a patient of this age. There is no pulmonary parenchymal infiltrate, pulmonary edema, or pleural effusion. There is no pneumothorax.

IMPRESSION:

1. Perihilar and lower lung bronchial wall thickening. The bronchial wall thickening could reflect infection, bronchitis, or asthma.
2. No evidence of a confluent alveolar infiltrate.
